Atep Sutisna

Bandung, Jawa Barat Indonesia ◦ atep.sutisna7@gmail.com ◦ 085320058217

Graduated from Bale University Bandung, specializing in Web Developer, with 2 years of experience in Software House. Experienced in building or developing web applications, mastering back-end (.Net Core, Laravel, CI4) and front-end (Vue.js, jQuery) development, as well as various tech stacks needed in web application development.

Work Experience

PT. Adidata Informatika   **Jakarta Barat**
.Net Developer   **2025**

- The back end continues to build a mobile attendance application using .NET Core. It uses a PostgreSQL database (face scan & web app) and MySQL (HR Management integration). It builds and revises APIs for attendance, permit, leave, monitoring members and data synchronization between systems. It uses FCM Push Notifications that will be displayed on mobile devices.

PT. Inovasi Dinamika Solusi   **Buah Batu, Bandung**
Web Programmer   **2024-2025**

- Back End development with .Net Core (collaborating with ReactJs in FE) for DigiProc; building dashboard, chart details, and Excel export features.
- Full-stack development with Laravel and Vue.js (Options API) for Mutabaah Quran; built follow institution, user profile, and master gallery features.
- Back End Support using .Net Core for Vortex; focused on developing contractor, vessel, country, function, area modules.
- Front End Support using Vue.js (Options API) for Alakad; build incident report and incident report follow up features.

PT. Arkamaya   **Buah Batu, Bandung**
Web Programmer   **2023-2024**

- Full-stack development with CodeIgniter 4 (CI4) and jQuery for PA (Performance Appraisal) system; built core features such as setup, employees, Excel import/export, and email sending.
- Full-stack development with .Net and jQuery for OTDS application; optimized data table via stored procedure, added Excel export feature, added vehicle type feature.
- Served as Front End Developer with jQuery for Replanish project; built master data and Excel import/export functionality.
- Full-stack development with .Net and jQuery for Sustain; implemented email file sending feature, WAJatis integration, and storage migration to AWS S3.
- Support Programmer using .Net and Vue.js (Composition API) for DigiTalent; focused on optimizing data display from stored procedures and PDF export.
- Full-stack development with .Net Core and jQuery for TTEP; building school, student, teacher, role auth settings, and related approval modules.
